Subject : Expenditure on Government
Schools

Please submit a statement
showing expenditure incurred by you
during 1st April, 1947 up to 29th
February, 1948 on Government Schools under:

- (a) Recurrent vote
- (b) Extraordinary including minor
works
- (c) Other Departments fund.

You should state the name of the
school concerned in all cases as well as
the nature of the services and supplies.

Reformatory schools, Remand
Homes and the school for the Blind
should be excluded.

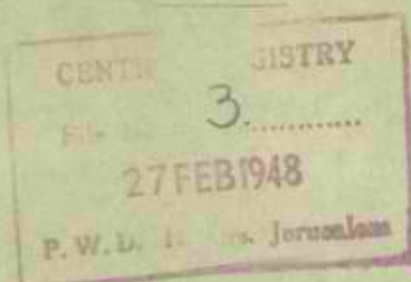

The statement to be submitted
in two copies as early as possible.

GOVERNMENT OF PALESTINE

IN REPLY PLEASE QUOTE

No. 2420/1/PE

DEPARTMENT OF EDUCATION,
JERUSALEM.

25 February, 1948.

CAO
76

Director of Public Works
Jerusalem.

Subject :- Expenditure on Government Schools under
this Department in the financial year
1947 - 48.

I shall be obliged if you will kindly give
me a statement of the amounts spent on Government
schools managed by this Department in the period
1st April, 1947 up to date in respect of

(a) recurrent expenditure including
rents.

(b) non-recurrent expenditure

2. The expenditure under (a) above should dis-
tinguish clearly between schools and offices and the
expenditure under (b) should be itemized to facilitate
checking.

3. Any sums which have been spent by you out of
financial allocations issued by my Department should
be indicated.

4. Reformatory Schools, Remand Homes and the
School for the Blind should be excluded as they do not
come under this Department.

5. This information is required at present to
enable me to pay Jewish Education their share under
Grants-in-Aid and to avoid considerable readjustments
in the coming financial year which might consist of
one month and a half only.

6. It will not be difficult for you in April
to bring up to date the statement to be forwarded now
by simply indicating at that time what expenditure
is not included in the statement.

7. An early reply will be greatly appreciated
so that payment may be effected before the end of the
financial year.

September 22nd, 1947

District Engineer,
Nablus District.

Subject : Safety Barriers in front of
School Gates.

Reference: Your 201/9 of 10.9.1947.

Please advise the District Inspector
of Education, Samaria District, that I
have no funds for the above work. The
Director of Education has been asked, in
my 3 of 17th July 1947, to provide the
necessary funds, but so far nothing *has*
transpired.

Director of Public Works.

Subject:- Safety Barriers in front
of School gates.

Ref'nce:- My 201/9 of 5.6.47 &
201/14 of 7.7.47

The District Inspector of
Education, Samaria District, is
pressing for the early erection
of barriers in front of entrances
to Government Schools.

2. I shall, therefore, be
grateful if arrangements can be
made to supply me with funds to
enable me to carry out the
required works.

3.

Director of Education, July 17th, 1947

Subject : Safety barriers in front of
School Gates.

Reference: Your letter No. 3279/PE of
2.4.1947. 98

The erection of safety barriers in front of school gates, as requested in your letter under reference and as amended below, is estimated to cost L.P. 1,100.

2. The local Education, Police and P.W.D. staffs have recommended the following amendments:

- a) No barriers are required for the Girls' School, Al Bireh and the Boys' School, Al Wihde Haifa as there is practically no motor traffic on the adjacent roads.
- b) A barrier is required for the Elementary Boys' School, Jenin.

3. I have no funds available for this work. If you wish the work to be put in hand will you please place at my disposal the necessary funds.

NAZARETH.

7th. July, 1947.

Director of Public Works.
Jerusalem.

Subject :- Safety barriers in front of
School gates.

Reference:- Your No.3 of 23.4.1947.

The school headmasters and the Police
(Traffic) authorities have been consulted and
hereunder my recommendations and estimate :-

- a. Beisan Secondary Boys' School.
Type of barrier chosen:- Proposal 'D'
Frame of 2" W.I. pipes and 8 m/s chains
space between frames 4.80 M.R.
Estimated Cost. LP. 26.000
- b. Sawwin Boys' School Safad.
Type of barrier chosen:- Proposal 'A'
stone masonry pillars with strong
wire mesh on iron frames fixed to
pillars. Estimated Cost LP. 45.000
- c. Nazareth Secondary Boys' School.
As for (a) above, space between
frames 3.50 M.R. Estimated cost LP. 25.000

2. The work is considered by the School
Headmasters as being of vital importance.

Actg. DIRECTOR OF PUBLIC WORKS

Subject : Safety Barriers in front of
School Gates

Reference : Your 3 of 23.4.47

The Local Police and School Authorities have been consulted and it appears that no safety barrier is required at Al Wahda School, as the entrance to this school does not front any main motor road. The entrance to the school is on a side lane about 80 m. from the main road.

Type 'D' barrier has been found the most suitable for the other two schools. The estimated cost of a barrier made of ϕ 2" W.1 pipes with elbows and Tees 4.5 m. long including painting and fixing is LP.25.- per barrier.

99

23rd April, 1947.

District Engineer,
Jerusalem District (2 copies)
Jaffa District
Haifa District
Nazareth District
Nablus District.

Subject : Safety barriers in front of school gates.

The Director of Education has requested that suitable barriers be erected in front of entrances to Government schools fronting on to main motor roads as per attached list.

2. It is suggested that, for uniformity, these barriers be made 1 m. high, and in length equal to the width of the school entrance gate plus the width of pavement. They might consist of wire mesh or two chains of say 8 m.d.s. S.I. links hung approximately 90 cm. and 50 cm. respectively above pavement, on steel bars on posts of one of the types described hereunder :

Proposed types of posts :

- ✓ A. Stone masonry 35 x 35 cm. built in cement mortar and set back about 90 cm. behind road line;
- B. Precast reinforced concrete 20 x 20 cm. with chamfered edges, set back as last.
- C. 4" S.I. pipe with screwed-on cap, filled with concrete and painted.
- ✓ D. Frame of 2" S.I. pipes, (painted) elbows and tees, shaped thus:  upon between legs about 60 cm.

3. Please submit your comments and estimate of cost of these barriers, including manufacture and erection.

4. The choice of the post type to be used in each particular case should be made by you in consultation with local Police and School authorities.

Dear Mr. Crook,

I refer to the last meeting of the Road Safety Committee held on 7th March, 1947, at which Mr. McLaughlan was present and to attach herewith a list showing the names of Government schools where the erection of a barrier in front of the school gate is considered necessary and essential. Mr. McLaughlan kindly promised at the meeting to attend to this matter.

2. I leave it to you, and to the Police authorities to decide on the style and manner in which these barriers are to be erected.

Yours sincerely,

DD. (3)

Reference: Your No. 3 of 3.10.46

I think the amount, LP.1,005.970, for school rents, shown on page 3 of the statement forwarded with your letter under reference is not correct. I shall be obliged if you will reexamine this figure and exclude from it rents, if any, paid in respect of the following institutions which do not come under this Department:

- (a) Reformatory School, Rishon
- (b) Girls' Reformatory School, Bethlehem
- (c) Boys' Reformatory School, Mekor Haim
- (d) School of the Blind, Ramallah
- (e) Prevocational Training School
- (f) Boys' Reformatory School, Bethlehem
- (g) Boys' Remand Home
- (h) Reformatory School, Acre
- (i) Girls' Remand Home, if any.

2. This Department does not require information on the abovementioned institutions and it is requested that in future recurrent and non-recurrent expenditure incurred on them be excluded from the statements sought by this Department.

DEPARTMENT OF EDUCATION
JERUSALEM

1820/PE.

27th September, 1946.

Director of Public Works.Subject : Public Works Extraordinary, 1947-48.Reference: Chief Secretary's circular No. 12
(7/30/46) of 14th September, 1946,
paragraph 3(b).

Major works under LP.1000 required by this Department under Public Works Extraordinary comprise two items only :

- (a) Construction and erection of a Main Gate at the Government Trade School, Hefa.
- (b) Conversion of the existing stables at Safed Hostel, into a workshop.

Estimated cost of item (b) is LP.800. (Your 3/7/1 of 8-7-1946, refers).

2. The list of Major Works over LP.1,000 has been submitted to the Chief Secretary for approval in principle of their consideration in connection with the draft estimates for 1947-48 in accordance with the procedure set out in G.P.318 Heading B. My 1820/1/PE of 21st August, 1946, to Chief Secretary, with copy to you, refers.

3. My requirements under Minor New Works, so far as can be ascertained at present, are shown in detail in the attached list, submitted in duplicate, and amount to LP.4208.

These items have been selected from long lists of Minor Works submitted by District Inspectors as being urgently necessary.

4. It is anticipated that an additional amount of LP.2,000 will be required for Minor Works for new hirings likely to be occupied next year. It should be noted that the cost of latrines for each new hiring is approximately LP.400.

5. Regarding provision for the maintenance of school buildings, the handing over of State Domain buildings to Local Education Authorities, in accordance with the State Domain Committee's recommendations, is proceeding, but since the arrangements for effecting the transfer are so protracted, and the number actually taken over so small it is not considered advisable to make any reduction in the maintenance of vote at least for next year.

WORKS DEPARTMENT

described as _____

orted to have been completed on

DIRECTOR OF PUBLIC WORKS

District Engineer,
Jerusalem District.
Jaffa District.
Haifa District.
Nazareth District.
Nablus District.

February 26, 1946.

Subject:- Construction of Village Schools.

Reference:- My No.3 of 4-1-1943.

In recent correspondence I have had with the Director of Education on this subject, it has been emphasized that the three inspections of the work made by your staff is inadequate. That three inspections would prove to be inadequate was well known to me, but I now wish your comments on the subject from the point of view of what additional staff you would require to give more supervision to the work, but without posting a man whole time to each school.

2. Do you consider reasonably good supervision could be obtained by arranging for weekly or fortnightly inspections?

3. If you consider inspections at regular intervals may be arranged on the lines indicated in paragraph 2, please inform me:

- (a) what additional staff you will require?
- (b) what type of man you will need? (e.g. Clerk of Works, Overseer, or Ganger).
- (c) what rate of pay he should be given, per day, per month, with or without High Cost of Living Allowance?
- (d) how he will get around from one job to the other?
- (e) whether you can yourself find the man you need?

and so on.

4. In addition to the 181 classrooms under construction throughout Palestine at the present time, the following is the programme for 1946:-

Classrooms to be erected in 1946.

Galilee District	- 41
Southern District	- 70
Jerusalem District	- 43
Samaria District	- 88

5. As the Education and P.W.D. Districts do not coincide you should ascertain how many of the 181 classrooms, now in hand, and how many of the 242 to be erected in 1946 lie within your District, and inform me of the position when you reply to this letter.

6. An urgent reply is required to enable me to discuss the matter further with the Director of Education.

Actg. DIRECTOR OF PUBLIC WORKS

Copy to: 3.

3/6/1.

23rd February, 1946.

Director of Education.

Subject : Acre Local Education Committee

Reference: Your No. 142/24/1 of 18.2.46.

To design a building an Architect must know any two of the following three factors viz:

- (a) the funds available
- (b) materials to be used
- (c) accommodation required.

2. When he knows them he can then proceed with designing and planning the buildings. I do not know whether in this case the Architect was provided with the above information by the Acre, Local Education Committee.

3. Regarding the design shown on the drawing (which I return herewith) the following arrangements in my opinion are unsatisfactory viz:

- (a) Grouping of Doctors Room, Changing Room and Showers etc. near the entrance.
- (b) The Foyer seems to be too large.
- (c) Having the Gymnasium as a part of the main building
- (d) The Stage seems too large for a school
- (e) The Library is too large unless used as a reading room as well.
- (f) The Laboratories are too near the Gymnasium and Entrance Hall.
- (g) Stairs should be somewhere near the centre of the building and
- (h) The Lavatory block should not be on the western side of the building.

(Sgd.) H. C. H. JONES

ACTG. DIRECTOR OF PUBLIC WORKS.

35.

Copy to: 11/19.
3. ✓

3/8.

5th December, 1945.

Director of Education.

Subject : Construction of Village School
Buildings.

Reference: Your 1640/PE of 30.11.1945.

I have the following observations to offer on the proposals contained in letter No.569/EJ of 7.11.45 from the District Inspector of Education Jerusalem which was forwarded with your letter under reference :-

Pars.2 - The committee give no reasons for their opinion that para.(b) of my letter 3/8 of 2.5.35 is impracticable. It has been in operation for 10 years and I have not hitherto heard of any complaints. I do not know whether the District Officer has in his possession a locked tender box for the receipt of tenders. The District Engineer has such a box.

Pars.3 - The District Engineer is only required to certify the final bill if he is satisfied that the work has been satisfactorily completed, "so far as can be ascertained" i.e. ascertained in accordance with the approved procedure.

Pars 3 (a) - If the clerks of works are to certify the final bills and are not to be responsible to the District Engineer but to you, I would raise no objection, but it would then not be necessary for the District Engineer to make any inspections and my department would cease to have any responsibilities in connection with the construction of the buildings.

Pars.3(b) - If clerks of works are to be employed to ensure compliance with the plans and specifications the need for two foremen also "to ensure that the construction of the school buildings are in accordance with approved plans, specifications, and conditions of contract....." is not understood.

2. I note from para.2 of your letter under reply that you anticipate obtaining approval for the appointment of an engineer to your staff to supervise school construction work. If and when that approval is received it is my intention to ask to be relieved of all further duties in connection with village school construction.

3/8.

PUBLIC WORKS DEPARTMENT
JERUSALEM. 64

November 15, 1946

Chief Secretary.

copy to 3

Subject:- Construction of School Buildings.

Reference:- No.1317/2060 of 9-11-1945 from Director of Education.

The proposal contained in the letter under reference to appoint a permanent officer to a post of Structural Engineer on the establishment of the Education Department is a revival of that dealt with in my letters to you No.3 of 5-9-1942 and 5-10-1942. That proposal was discussed at a meeting in your office on 22-10-1942 - vide your P/35/29/40 of 5-11-1942 - and was not approved by Government.

2. The Director of Education has I fear fallen into the fatal error of associating the name of an officer with a new post which he desires to establish in his department. I submit that it is necessary first to establish the need for the creation in his department of a permanent post of Structural Engineer. Should that be approved the question of filling the post would be a separate issue.

3. I know of no reason for the creation of a post of Structural Engineer in the Department of Education, and as you are aware, I deprecate the creation of "works" departments in non technical departments. "quis custodiet ipsos custodes" ?, or in other words who will look after the Structural Engineer?

4. The procedure for the construction of schools was laid down in your P/35/29/40 of 5-11-1942. If that procedure has proved to be unsatisfactory I submit that it should be reviewed before any decision is taken to create a little works department in the Department of Education. As I have pointed out in paragraph 3 of my letter No.3 of 5-9-1942, provided staff and transport facilities are made available, my department can itself carry out any given programme of building work.

5. I am aware that there is considerable activity in the construction of village schools at the present time, and my District Engineers are being constantly pressed in some areas to give more supervision to this work than was contemplated in the approved procedure. This situation will not I submit last indefinitely and does not call for the permanent appointment of a Structural Engineer to the Department of Education.

2.11.1945

63B

Director of Public Works,

Subject : Public Works Extraordinary 1946-47.

Major works under LP.1,000 required by this Department, under Public Works Extraordinary comprise one item only, the construction and erection of a main gate for the Government Trade School, Haifa.

The list of Major Works over LP.1,000 will be submitted to Chief Secretary shortly for approval in principle for consideration in connection with the Draft Estimates for 1946-47 in accordance with the procedure set out in G.R. 318 Heading B.

Regarding provision for the maintenance of school buildings, the handing over of State Domain buildings to Local Education Authorities, in accordance with the State Domain Committee's recommendation, is proceeding, but since the arrangements for effecting the transfer are so protracted, and the number actually taken over so small it is not considered advisable to make any reduction in the maintenance vote for next year at least.

Subject:- Government Schools, Barrack
Damages under G.R.325.

The District Inspector of Education, Jerusalem, expects me to replace, as a matter of normal maintenance, broken window panes in schools. The cost of doing this now where necessary is estimated at over IP.40.--.

2. All windows are normally provided with closing devices and hooks. If these are damaged or broken as a matter of fair wear and tear it is up to the occupant to inform me of the fact and I then arrange for the necessary repairs. If the occupant fails to do so he becomes liable under G.R.325, for any damage taking place as a result of his failure. If the panes are broken by outsiders there is no reason why their replacement should be charged to my maintenance vote rather than to one of your votes for administering the schools.

3. I have therefore to request that arrangements be made by your Inspector for replacing all those broken or missing panes the present condition of which cannot be proved to be due to fair wear and tear.

✓ P.W.D. Ref. No. 11/19 of 24.9.45

11/19.

PUBLIC WORKS DEPARTMENT
JERUSALEM. 55

September 24, 1945.

District Engineer,
Jerusalem District.

Subject:- Government Schools.

Reference:- Your S.A. of 19-9-1945.

Your attitude here may be:

(a) That unless the occupier reports a damage repair to the District Engineer forthwith, explaining the circumstances, he increases the difficulty of exonerating himself from eventual responsibility in this respect.

(b) The same comment applies to window hooks. But knowing the state of maintenance of many Government buildings, I fear we should not have a strong case if we tried to press the "annual repairs" too closely.

G.R.315(1) and (11) specifies inspection "at such intervals as may be necessary".

2. To save argument therefore the solution is to arrange for frequent (quarterly?) superficial visits with the knowledge of the occupant and insist on the observance of G.R.315(11). The onus will then be on the occupier, provided that the defects are made good.

6. I have suggested some time ago to the Director of Education that he might obtain the services on a temporary basis of a good clerk of works to assist his department to do more than the limited staff of my department can do under the approved procedure. As indicated in the letter from the Director of Education under reference, Mr. Farouki was first suggested by me and later Mr. Mansour was nominated. Mr. Farouki is no longer available, and Mr. Mansour is apparently not acceptable to the Director of Education.

7. As it is evident that the village school programme is particularly heavy at the moment and as it is unlikely to continue indefinitely at its present rate, it is far from clear to me what duties would fall to the permanent Structural Engineer when the rush comes. It would appear that the present need could be met either by the appointment of a temporary clerk of works for a definite period, or by the assignment to the Department of Education of some permanent officer of my department who would revert to his substantive duties when his services were no longer needed. A permanent officer is always regarded as being more reliable than a temporary officer, and if it will assist the Director of Education I am prepared, subject to your approval, to assign to him for duty an officer of sufficient seniority to undertake the supervision of construction of a village school programme provided my department is at the same time relieved of all responsibilities in connection with the construction of village schools for the period of the assignment.

Subject :- Leases of premises used
as Schools.

For your information and guidance I now have to inform you that the Law Officers of the Crown have now advised that "a school is not a "dwelling house" within the meaning of the Rent Restrictions (Dwelling-Houses) ordinance, 1940, but it is "premises" within the meaning of the Rent Restrictions (Business Premises) Ordinance, 1941, and therefore the Housing Commission should refuse to pay any increase in rent for schools in areas to which the latter Ordinance has been applied."

Sgd. B. O. Danham.

REPLIES 40

Director of Public Works.

Subject : State Domain Properties.

Reference: Your letter No.3/6/1 of 10.8.44.

A list of State Domain Properties occupied by this Department is herewith enclosed. The list has now been sent to the Director of Land Settlement with the request that arrangements be made for their registration in the names of the respective Local Education Authorities in trust for education. The Director of Land Settlement has however been asked to withhold the registration of the properties in Jerusalem in the name of the Local Education Authority until such time as the recently formed Committee is functioning properly.

2. All the properties which appear in the list are maintained by your Department; and with the exception of the properties in Jerusalem, the rest will be handed over to the Local Education Authorities concerned. But, since the arrangements for effecting the transfer take a long time to complete, provision for the maintenance of the properties by your Department should be made in the Estimates for 1945-46.

I regret I am not prepared to comment on the Regulations laid down by the Department of Public Health.

I agree that a room of less height would require less materials, but the saving would be found to be quite a small percentage quantity of stone, brick, sand, cement, lime or similar materials, on none of which is there at present a serious shortage.

Argument (b) is a strange one and contrary to the experience of myself and of my advisory officers.

I agree that the principles agreed to by us in my Circular No.3 dated 4th January 1943 should continue to be observed.

Instructions to the contrary effect issued by the District Officer Ramleh will be disregarded.

Will you be good enough to make the necessary arrangements.

2. The Foreman appointed by the Authority has a necessary and useful part to play in any large scale programme of building as the representative of the Authority. In formal language :-

The Authority
The Foreman

'directs'
'controls' and 'executes'
on behalf of the
Authority.

The District Engineer

'advises'.

3. The advice of the District Engineer, on the occasion of his official visits or on any other occasion which he considers necessary, should be transmitted to the Authority in writing. Advice on routine matters, when requested or required, will be given by the normal methods of communication between the executive officers concerned.

Director Medical Services.
 Director, Public Works.

AD(2)
 Subject :- Height of Classrooms.

①
 I have received an inquiry from the Va'ad Leumi whether the height of 4 metres, laid down in Public Health Department's regulations as the standard for classrooms, may not be reduced to $3\frac{1}{2}$ m. The arguments adduced for the proposed change are (a) shortage of materials, and (b) that the lower height is better for ventilation and cooling.

2. I shall be grateful for your views.

Director,
Public Works Department,
Jerusalem.

A. O.

Subject:- Expenditure on Government
Schools in the Financial
Year 1943-44.

I shall be obliged if you will
give me a statement of the amounts spent
on Government schools in the period 1.4.43 -
31.3.44 in respect of :-

- (a) recurrent expenditure, including rents;
- (b) non-recurrent expenditure.

The expenditure under (a) should
distinguish clearly between schools and
offices (Headquarters and District Education
Offices). Expenditure on Probation Schools
and offices should not be included.

The expenditure under (b) should
be itemised to distinguish sums spent on
Urban Schools under the original Loan Scheme
from other Major Works.

DIRECTOR OF EDUCATION.

EXHIBIT IN "The State" by
EXHIBIT IN "The State" by
BY
DATE 1968 05 24

3/5/2.

4th August, 1944.

Chief Secretary.

Subject : Minor Works - Latrine at
Ramle Boys' School.

I have to refer to the letter on this subject addressed to you by the Director of Education No.2859/1/2/PE dated 1st August, 1944.

2. The buildings of Ramle Boys' School are at present State Domain maintainable from funds allocated to this Department.

3. The Report of the Committee on Educational (Ma'aref) properties dated 19.6.42 paragraphs 11 and 12 recommends that all such properties be handed over to the charge of the Local Educational Committee.

I am unaware whether this recommendation has been accepted by Government for adoption and whether it is likely that the State Domain in question will become the property of the Local Education Committee in the near future.

4. If this is the case, I have nothing more to say. Presumably the Education Committee would then carry out this project at its own expense and, being responsible for its future maintenance, could adopt any Standard of construction it considered economical.

5. But if this is not the case, and if I am to continue to be responsible to Government for the design, construction and maintenance of Government buildings as stipulated in G.R.301-304 I must state that the proposal of the Director of Education would be entirely unacceptable to me.

6. I do not doubt for a moment that there are plenty of works which could be carried out at cheaper prices than those estimated by the designer, were the supervision and authority of the latter removed.

7. There is no need however for the adoption of a procedure such as that suggested. The Local Education Committee is willing, apparently, to pay all costs of the project above LP.340. The work of course will be carried out under contract after tender; I shall be very pleased to invite the Education Authority or a reputable contractor nominated by itself to submit a tender, which will naturally be the lowest. If the tender is above LP.340 you would invite the Authority to pay the balance into Revenue and transmit to me a like amount.

p.t.o.

I shall see that the work is carried out properly in terms of the Specification, and everyone will, presumably, be satisfied.

8. The letter of the Director of Education is perhaps not quite clear on the facts.

The P.W.D. estimate for a water-carriage latrine block of the size required, built separately and newly, is LP.375.

The provision of the necessary percolation pit and a water storage tank for flushing is estimated at LP.100, which, with an allowance of LP.25 for contingencies, amounts to a total of LP.500.

3/8/4

PUBLIC WORKS DEPARTMENT
JERUSALEM.

4

17th March, 1944.

Director of Education.

Subject :- Village Schools - vaulted - standard type plan.

Reference:- Your 1640/PW of 4th February, 1944.

1. I am now able, I hope, to complete action on this matter.

I enclose herewith:-

- (a) Plan No. B/1657 single story single rooms
- (b) " " B/1658 " two "
- (c) " " B/1658 " three "
- (d) " " B/1658 sheets 1-4 double story three rooms.
- (e) " " B/1658/1 Joinery details
- (f) Outline Specification (6 copies)
- (g) Schedule of controlled materials required for (a)-(d) above, cement to foundations excluded.

2. You will appreciate, of course, that no type plan or outline specification is exactly suitable for every case - some adaptation is required.

These have been prepared in a specific form with a definite aim, which is to enable you in the simplest manner and with the minimum trouble and complication to get erected class-rooms built in a style traditional to the country by local artisans working on simple but sound principles.

Neither plans nor specification are complete in detail; they are not meant to be.

They are however simple, and the necessary additions or omissions may be made to suit the local requirements of each case.

3. With the assistance of the District Engineer, obtained under the procedure previously agreed upon between us, it is hoped that this aim can be achieved.

4. You will require extra copies of the plans and it is suggested that you arrange to put at the disposal of the Senior Architect the necessary printing paper for the number of copies desired.

(Sd) J. S. BOISSIER

P9

VILLAGE SCHOOL
VAULTED TYPE BUILDING.

Outline specification of materials to be used and work to be performed in the erection of a standard vaulted type school.

- | | |
|------------------------------|--|
| <u>Setting out.</u> | 1. The Contractor shall set out the building on the site according to the dimensions given on the drawing and with due regard to the required orientation. |
| <u>Materials and Labour.</u> | 2. The Contractor shall supply all materials, provide all labour whatsoever necessary for the construction and completion of the building in accordance with the true intent and meaning of the drawings. |
| <u>Trees.</u> | 3. Other than trees growing upon the area actually to be covered by the building, no tree may be felled, up-rooted or damaged in any manner. |
| <u>Blasting.</u> | 4. When using explosives for blasting purposes every precaution shall be taken to ensure the safety of all persons, animals and things. |
| <u>Dimensions.</u> | 5. Dimensions, such as course heights for flat arches, sill stones, stone skirtings, jambs, voussoirs of arches, radius of arches, curve of vaults, etc. not expressly stated or specified may be scaled by the builder from the drawing. |
| <u>Foundations.</u> | 6. All walls and piers of the building shall, beneath the surface of the ground, be appropriately increased in sectional area to accord with best local building practice and shall be founded at suitable depths according to the nature of the soil, local custom and as approved by the _____. |
| <u>Stone.</u> | 7. All stones to be of the best quality and of the kind approved by the _____.
Stones shall be set on the natural or quarry bed and be bedded in a full mortar bed, with fully squeezed out joints.
Unless otherwise dimensioned or required the length of a stone shall be at least $1\frac{1}{2}$ times its height but no stone shall be less than 35 cms. in length. Perpend shall break joint by at least 20 cms.
Stones shall be cleaned and thoroughly wetted before bedding. |
| <u>Lime.</u> | 8. To be well burnt, fresh, lump lime, free from impurities, thoroughly slaked and screened and to be run into putty at least one month before using and to be kept clean and workable. |
| <u>Sand.</u> | 9. To be sea sand or machine-crushed hard limestone, screened and graded to pass 6 mm. square mesh sieve and where used for the setting coat of plastering to pass 1 mm. sieve. |
| <u>Cement.</u> | 10. To be Portland Cement, used fresh. |
| <u>Mortar.</u> | 11. Mortar for masonry work to be composed of 1 part lime to $2\frac{1}{2}$ parts sand. |

Dressing.

12. (a) The following shall be dressed Mutabbeh: Reveals, tops of sills, soffits of arches and arched openings to verandahs, including the centre pillars of twin arches on first floor. Jambs, tops of sills and soffits of lintols or flat arches to window and door openings.

The recessed panels for ventilator openings.
Tops of copings.

Rain water spouts.

Steps, stairs, landings, stone pavings and floors.

(b) Other exposed faces of stone work to be dressed 'Taltish', 'Musamsam', 'Tubsi' or other agreed coarse dressing.

(c) Interior faces of walls and other faces which are to receive plaster shall be left "Khami".

Joints.

13. Beds and joints of each stone shall be properly squared and dressed back for a depth of 10 cms. from the face.

Walls.

14. To be constructed of two outer faces of stone built to even courses, with the cavity, or distance between the same, filled with stones and spalls of similar stones embedded in lime mortar as specified. The filling in the cavity is to be brought up level course by course with stone work.

Build into all masonry walls bond stones of similar stone two to each meter square of wall face, tailing into the wall for full thickness thereof and set staggering in elevation.

The length of a bond stone, may be less than the minimum specified in clause 6 but shall not be less than its own height, and throughout its depth into the wall it shall be roughly squared and hold its face dimensions.

Centering for vaults.

15. The centering for vaults is to be formed and constructed in accordance with local building practice and custom. A sufficiency of vertical props or posts shall be used, resting on solid ground or on templates or soleplates, and shall be securely braced and tied together, and the shapes of the intrados of the vaults shall be formed in the customary manner with branches of trees, brushwood, (or whatever suitable material may be available) secured to the heads of the props or posts, to receive a layer of puddled earth or clay laid on the upper surface and shaped to the required mould of the vaults.

The centering shall be of sufficient strength and rigidity safely to sustain the superimposed load and shall remain undisturbed in position for at least one month in favourable weather and otherwise for a longer period according to circumstances.

Vaults.

16. Vaults shall be built generally according to drawing, of good quality Nari stones bedded in lime mortar as specified. A proportion of ashes or crushed burnt clay may to advantage be substituted for sand.

The vaults shall be constructed to rise simultaneously from springing level, on all sides. The groined intersections shall be formed in selected large-sized stones, cut wedge-shaped, laid and bounded in herring-bone pattern with good alternate overlaps, and keyed at the crown of the vault with a keystone cut true to shape in order to wedge and securely key the groins together.

Form soffits of vaults in stones roughly axed to voussoir shape and bedded in regular courses between the groin and supporting end walls.

During construction the whole shall be bedded firmly down into the puddled clay form overlying the centering.

Fill in between and over the vaults up to the required floor or roof level, as the case may be, with stone spalls bedded in coarse lime mortar composed of 1 part lime to $3\frac{1}{2}$ parts sand. Deposit the filling in even layers throughout the entire area and finish to falls directed to R.W. outlets.

Verandah
arches.

17. The face of voussoirs to be set flush with general masonry on the exterior face and set projecting 5 cms. over the interior face of arcade. Tie the arcade wall to the wall of verandah with No.2 tie bars where shown on drawings.

Hardcore
under
floors,
etc.

18. Lay under all pavings, floors and steps on the ground floor a bed of hand-packed, clean, broken, hard stone of minimum finished thickness of 15 cms.

Pavings and
Floorings.

19. The paving of verandahs, landings and floors to be suitable hard stone square-cut balats, bedded solid in full mortar bed of lime mortar as specified but with the addition of $\frac{1}{4}$ part cement.

Alternative: Floors of classrooms may be paved with cement or terrazzo tiles of approved quality, make and colour, bedded in full mortar bed consisting of 1 part cement, $\frac{1}{4}$ part lime and 3 parts sand.

Stairs
and steps.

20. Stairs and steps to be of hard durable stone, in long lengths, dressed Mutabbeh and with slightly rounded nosings.

Skirtings.

21. To all stone-paved floors, steps and landing set similar stone skirtings, projecting 1 cm. over the finished plaster face of wall.

Where floors are covered with cement tiles set similar cement tile skirtings, projecting as described.

Ventilator
openings.

22. Face of ventilator panel to be recessed 5 cms. from the face of wall. Sills and lintols to be in single stone.

Copings.

23. To be of stones in lengths of 60 cms. approximately dressed weathering on top, set flush with general wall face, in full mortar bed.

Rainwater
spouts.

24. To be set projecting not less than 50 cms. from face of wall and to have chamfered edges as shown on drawing and be grooved for rainwater channel.

Roofing.

25. Cover roof with "Meddeh" composed of Hower, tibben and lime worked to the proper consistency, spread and consolidated to a minimum thickness of 10 cms. and worked to falls leading to rainwater outlets.

Cover with stone balats cut to shape as required and bedded in lime mortar as specified for "Pavings". Rake out joints to a depth of 2 cms. and point in "Maltina" waterproof jointing.

Pointing.

26. Rake out joints to a depth of 15 mm.; clean down and point all face stonework with pointing mortar composed of 1 part lime, 2 part cement (white cement if obtainable), $2\frac{1}{2}$ parts sand with the addition of pigments as necessary to harmonise the colour of the mortar with the stone.

- Timber. 27. To be deal or katrani pine, sound, well seasoned, free from loose or dead knots and undue sapwood.
- Windows, doors, and vents. 28. The joinery to be according to design and full size details as shown on drawings No. B/1658/1 but before commencing the work, the working sizes must be verified on site. Ventilators to be bottom-hung, open-in, prepared for external glazing and to be operated by a long-arm, fitted with a hook.
Ironmongery such as butts, spring catches, bolts, cabin hooks, strap hinges, locks, etc. to be of good and strong quality and shall be submitted for approval before incorporating in the work.
Prime all joinery on all faces and edges.
- Glass. 29. To be 3 mm. thick sheet glass bedded in putty, sprigged and puttied.
- Putty. 30. To be Linseed oil putty and to be used fresh.
- Plaster on walls. 31. Make up backs of walls and underside of vaults to an even surface with rough plaster; render, float and set in lime plaster 2 cms. thick. Coarse staff for render and float (1st and 2nd coats) to be composed of 1 part lime to 2 parts sand. The setting or 3rd coat to be 1 part lime putty to $1\frac{1}{2}$ parts of fine sieved sand.
- Black-board. 32. Keene's cement and lampblack to be mixed dry in the proportion of 20 parts Keene's cement and 1 part lampblack. Add water in sufficient quantity for immediate use only, and mix in small batches. Immediately after plastering is finished, paint one coat of lampblack and linseed oil, putty down with mixture of varnish and whiting and rub down, paint with two coats of black oil paint containing an extra quantity of drier (Turpentine etc.) and finish with one or two coats of special blackboard paint. ('Taffel Lack'). To prevent cracking it is advisable but not necessary to stretch and fix 2 cms. mesh wire netting. "Nesher" cement may be used if Keene's cement is not available.
- Paint. 33. To be of approved make and colour.
- Limewash. 34. To be composed of white fat lime with an admixture of 1 kg. tallow to 80 litres of lime and water, tinted as required and applied in 3 coats.
- Paint on woodwork. 35. Rub down all woodwork with glass paper, prime, stop with hard putty stopping and paint 3 coats oil colour.
- Leave clean. 36. On completion of all works clean, wash down all floors, windows and doors, and leave the building tidy, ready for occupation.

Extract from
Notes on a visit to Dhahariya
18.2.1944.

3

Called on D.D.C.; he mentioned the time it seemed to take to get things done, but assured him it was not uncommon and that if ever he was in difficulty I was sure that a semi-official communication to Jerusalem would solve it. He hoped the co-operation of the P.W.D. over building and maintaining the schools (which were all "village" ones) would not cease; I was sure that A.E. Giza and Dejem would in a rural and undeveloped area such as this give every assistance they could. He asked for some "old" timber out of the store for school repairs but this I said must rest entirely at the discretion of the P.W.D. Local representative.

A.E. Giza will doubtless be able to hold an even balance between allowing his representatives to give the D.D.C. every help in their power and retaining some control over them in his own hands.

Returned Jerusalem 1.30 p.m.
